# NOTE!

Submit us your want lists of plants that are difficult to locate. We grow many varieties, in small quantities, not listed in this catalogue.

Some plants listed as 5 gal. are growing in egg cans. Also a very few items listed as 1 gal. are in half-gallon containers.

Ten acres devoted entirely to the growing and marketing of good plants. We are growers—not brokers.

Stock from our nursery, for use in Los Angeles County, does not require inspection at destination.

We guarantee plants purchased from us to be true to name and will replace any found to be otherwise, but it is mutually understood and agreed between purchasers and ourselves that we will at no time be liable for an amount in excess of the original purchase price.

Free delivery on our regular truck routes.
